Remarks as Prepared for Delivery

Donald Trump took away our rights, but he can never take away our power. Republican attacks on abortion didn't begin with the end of *Roe*. And they didn't end there either.

Millions of women across this country are living with the devastating consequences of Republican abortion bans. Now comes Project 2025—a blueprint for banning abortion in all 50 states. It would give extremists like Donald Trump and JD Vance the power to monitor your pregnancy and even prosecute doctors for mailing abortion medication.

Make no mistake—the threat of Project 2025 is very real. But so is our ability to stop it.

In 2022, Democrats didn't just run on reproductive freedom. We won on reproductive freedom. And in 2024, we're coming back to the polls to finish the job.

In his devastating opinion, Justice Alito wrote that, “women are not without electoral or political power.”

Donald Trump is about to find out just how true that is.

The opportunity is before us. The power is in our hands. And the time is now.
